SOFIHUB PERSONAL ALARM SYSTEMS - NOW AVAILABLE!

After a successful trial in a select group of retail outlets we're excited to formally introduce Sofihub to the Aidacare product range.

The Sofihub range consists of two key products; TEQ Secure Safety Pendant; and TEQ Home. The TEQ Secure Safety Pendant is expected to be the volume product and as such will be held in stock. It should lead to further discussions for the TEQ Home system. See below for details.

PRODUCT INFORMATION

- **TEQ Secure Safety Pendant:** lightweight, easy to use safety pendant that at the touch of a button can issue an emergency request via SMS to multiple people such as carers or family. Equipped with GPS, it can instantly pinpoint a person's location and enable immediate voice contact via a built-in speaker phone. **Product code: BEA007855, pictured below (left).**
- **TEQ Home:** an ambient, assisted-living technology, designed to promote well-being and independence by using smart technology. Utilizing non-invasive motion sensors (x8) to detect changes or anomalies in key daily routines, remotely alerting carers and family when help is needed. **Product code: BEA007850, pictured below (right).**
