

Caeli Combination Mattress System

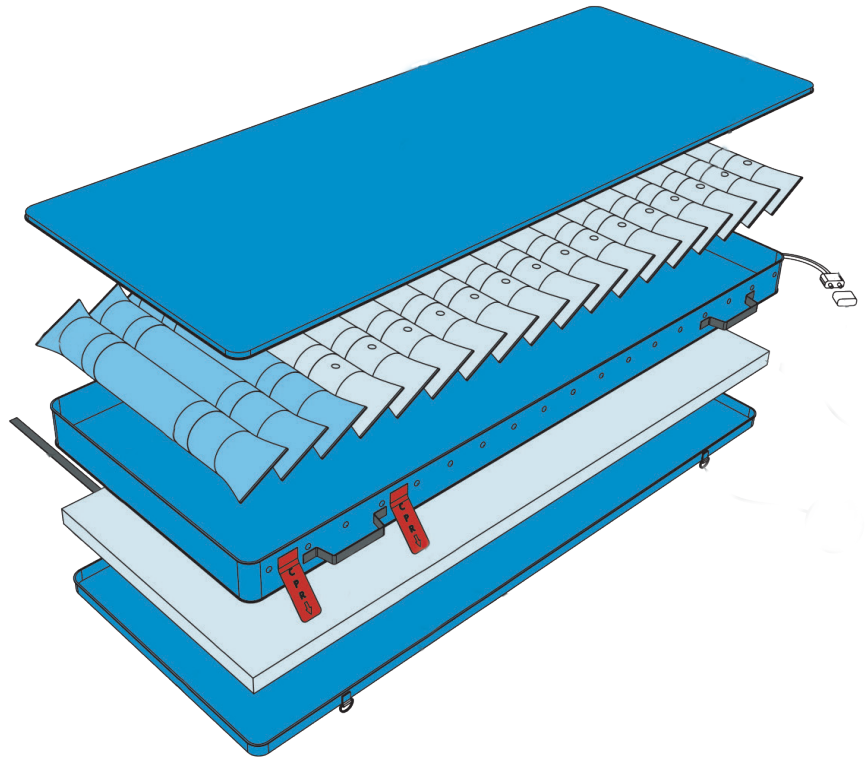

Combination mattress replacement system combining 125mm low air loss alternating cells with a 50mm protective foam underlay. Ideal for pressure injury prevention in the home and community and residential aged care environments.

Caeli Combination Mattress System

Features & Benefits:

- **Combination mattress** replacement with 125mm alternating air cells and 50mm foam underlay.
- **Low air loss cells** assist with cooling, reducing moisture build up.
- **Dual Release CPR** valves for rapid deflation in an emergency.
- **Transport cap** keeps mattress inflated for up to 24 hours.
- **Carry handles** on both sides.
- **Fluid resistant cover** with two-way stretch material.
- **Digital pump** with easy-to-use interface.
- **Tie-Down Straps** securely anchor the mattress to the bed surface for improved patient transfers.
